

Installation

Model specific instructions

For:

- Indian Challenger (All Versions)

These instructions are a model specific add-on to the general BoosterPlug installation instructions.

The general BoosterPlug installation instructions can be found in the "Downloads" section on the BoosterPlug.com website:

<http://www.boosterplug.com/shop/cms-downloads.html>

Installation Tips

- Install the BoosterPlug module as per the general installation papers.
- The picture below should help you locate the AIT sensor where the BoosterPlug is installed.
 - The AIT sensor is found in the intake manifold between the cylinder heads.
 - Remove the assembly on the right hand side of the bike to get access to the AIT sensor (Yellow circle in the pictures below).
 - The AIT sensor is located behind the front cylinder and marked with a square white label (Red circle in the pictures below)
- You have several choices for the BoosterPlug sensor location, but our favorite place is near the steering head or under the head light.
 - Just stick to the simple rules in the general installation instructions for placing the external sensor, and you'll be fine.
